PROFILE SUMMARY

Final-year B.Tech student in Computer Science and Engineering at VIT, Vellore, with strong knowledge of AI, deep learning, and full stack development. Experienced in research (IIT-BHU), hackathons, and building scalable web and AI-based solutions focused on real word applications.

EDUCATION

Vellore Institute of Technology (VIT), Vellore, India Sep 2022 – Jul 2026
B.Tech. in Computer Science and Engineering CGPA: 8.57
Relevant Courses: Deep Learning, Continual Learning, Artificial Intelligence, Statistics, Algorithms, Computer Networks, Operating Systems

Global Indian International School (GIIS), NOIDA, India 2021 – 2022
Higher Secondary Education - 12th Standard Percentage: 92.2
Relevant Courses: Physics, Chemistry, Math, Information Technology

PROJECTS

Aarogyam – AI-Powered Health Disease Detector

Python, PyTorch, Gemini API, Streamlit

- Built an AI-powered tool to diagnose diseases from medical images.
- Integrated Google Gemini API with Streamlit for interactive UI; connected with an IoT-based smart band for real-time data.
- Live at: [Aarogyam](#)

SwapIT – Add/drop Portal

TypeScript, NEXT.js, TailwindCSS

- Created SwapIT for seamless faculty slot swapping at VIT as part of VinnovateIT club.
- Improved faculty scheduling efficiency by 85% and streamlining more than 250+ slot exchanges per semester.
- Live at: [SwapIT](#)

Traverra – A Travel Planner

Flask, React, Gemini API, Render, Vercel

- Developed an itinerary planner using the Gemini API with around 94% formatting accuracy and almost 2 sec average response time.
- Enabled real-time itinerary generation based on destination, group details, and activity preferences.
- Live at: [Traverra](#)

WORK EXPERIENCE

Research Intern

Sep 2024 – Apr 2025

IIT-BHU, Varanasi

- Published a conference paper at ICCS'25 (Singapore) titled "MTL-FECAM: Bridging the Stability-Plasticity Tradeoff in Exemplar-Free Continual Learning".
- Achieved **90.89%–92.62%** accuracy, **0.0–0.27** forgetting using MTL-FECAM on 3 molecular datasets.
- Balanced stability-plasticity via the Mahalanobis metric, covariance modeling, and EWC; outperformed 10+ SOTA methods.

Web Developer (Freelance)

Jan 2024 – Apr 2024

SAYTRIP WAYS PVT LTD, Remote

- Developed **Tripster**, a live flight booking platform using Next.js, ShadCN, JSX, and MUI.
- Designed responsive, modular front-end components to support real-time flight data.

TECHNICAL SKILLS

Languages: C++, Python, Java, JavaScript, SQL

Web Development: HTML, CSS, NEXT.js, Node.js, TailwindCSS, MUI, ShadCN

Machine Learning: PyTorch, Numpy, Pandas, Matplotlib, Streamlit, Gemini API

Tools/Platforms: Tableau, Power BI, Git, GitHub, Jupyter, MySQL, Linux

ACHIEVEMENTS

- **Winner – Best Fresher Award**, Reverse Coding 2023 by ACM-VIT
- **Top 10 Finalist**, Yuvamanthan Hackathon 2024, organized by IIT Madras
